

Kaylee Gabriel

NC State Agricultural Institute Recruiter

Experienced Recruiter with a demonstrated history of working within a variety of higher education and agricultural areas including livestock and crops. Skilled in management, supervising, social media, networking, and problem solving. I am looking to continue making an impact within agriculture, while serving the community in a different way than I've been able to thus far through my own production farm.

Experience

Recruiter

01/2022 – Present

North Carolina State University

- Recruiting agriculturally interested students on a consistent basis
- Provide the leadership on behalf of recruitment efforts for the Ag Institute
- Recruitment budget management
- Travel across NC to visit school and recruitment events
- Highly involved in the planning and executing of the recruitment plan, organization, and administering
- AGI social media manager
- AGI Club advisor
- Spend-A-Day-At-State visit coordinator
- NC Collegiate Cattlemen's advisor

Swine Nursery-Finishing Manager

09/2019 – 01/2022

North Carolina State University

- Perform, train, and supervise duties including animal and room checks, feeding, animal treatment, inventory, sanitation and maintenance.
- Supervise and delegate duties to 1-5 part-time student employees on daily basis.
- Support other production phases of the farm including farrowing assistance, piglet processing and castration, boar collection, semen extending and bagging, artificial insemination, and the teaching and training of programs of the NCSU Animal Science department.
- Maintain recordkeeping for inventory, sales, treatment, and breeding in a database.
- Apply a wide variety of skills to support maintenance throughout the farm including electrical work, plumbing, carpentry, and landscape upkeep.

Research Technician

04/2018 – 09/2019

North Carolina State University

- Assisting with all tasks related to the care, feeding, and monitoring of research animals while applying treatments according to protocol, operating the effluent application system, and assisting with swine facility maintenance.
- Assist research personnel with implementation of treatments, collection, and recording of data.
- Guide undergraduate and graduate students in research projects.
- Assist with all tasks related to the establishment, maintenance, and disposition of the field crops and animal specimens.
