

# GENESIS GUILLORY

*Medicinal Herb Garden & Land Use Vision*

Clinical Herbalist | 301-532-7332 | GenesisLeVG@gmail.com

## PURPOSE

---

The purpose of this project is to establish a small-scale, low-impact medicinal herb garden focused on growing, harvesting, and producing plant-based remedies while maintaining the integrity and natural balance of the land.

This work is rooted in consistency, respect for the environment, and practical use of plant resources.

## LAND USE APPROACH

---

This will be a small, intentional cultivation space, not large-scale farming.

- Hand-tended herb beds or small plot cultivation
- Low-intervention, chemical-free growing methods
- Focus on soil awareness, seasonal cycles, and plant health
- Clean, organized, and contained use of space

The goal is to contribute to the land without disrupting its natural function.

## PLANNED HERB CULTIVATION

---

Initial focus will include medicinal and functional herbs:

- Calendula
- Lemon Balm
- Peppermint
- Chamomile
- Mullein
- Tulsi (Holy Basil)

Additional herbs may be introduced based on climate and land suitability.

## PRODUCTION & USE

---

Herbs will be used to create small-batch products including:

- Teas
- Tinctures
- Herbal oils
- Infusions

Production will remain small-scale and controlled, with an emphasis on quality and consistency rather than volume.

## CONTRIBUTION TO LANDOWNER

---

In addition to cultivation, I bring skills that can support landowners or farm businesses:

- Social media and digital promotion
- Content creation to increase visibility and customer engagement
- Educational opportunities related to herbs and wellness

This can help expand awareness and potential income streams connected to the land.

## **ON-SITE PRESENCE**

---

Due to the nature of herb cultivation and daily plant care, I am seeking a setup that allows for a small, low-impact living structure on-site. This supports:

- Daily monitoring of plant health
- Consistent care and harvesting
- Protection and maintenance of the growing area

All living arrangements would be respectful, contained, and aligned with property expectations.

## **OPERATING PRINCIPLES**

---

- Respect for land, property, and boundaries
- Clear communication and defined agreements
- Clean, organized, and low-impact presence
- Consistency in work and land use
- Willingness to adapt to the needs of the property

## **LONG-TERM VISION**

---

To develop a stable, small-scale herbal practice that produces quality plant-based products while maintaining a responsible and sustainable relationship with the land.
